2015 Urban Water Management Plan Update

Dear Planning Director:

The Urban Water Management Planning Act (Water Code Section 10610-10657) requires Amador Water Agency (Agency) to update its Urban Water Management Plan (UWMP) and submit the completed plan to California Department of Water Resources (DWR) every five years. We are reviewing our 2010 UWMP and will be considering revisions to it. The UWMP provides an overview of the Agency’s water supply sources and usage, recycled water, and water conservation programs. It is also part of the Agency’s long-term planning to ensure water supply reliability for Agency customers. State law requires that the water purveyor provide notice at least sixty days prior to all land use agencies of its intent to adopt the UWMP at a public meeting. This letter serves as the required notification.

The Draft 2015 UWMP update is expected to be available in April 2016 and will be posted on the Agency website at http://www.amadorwater.org/. Hard copies of the document will also be available upon request. As per State law, a public review period followed by a public hearing will be held to provide an opportunity to comment on the Draft UWMP.

Please contact me with any questions or comments at (209) 257-5245.

Sincerely,

Gene Mancebo
